

DID YOUR DC FLOOD OVER THE WEEKEND?

With a simple Environmental Management System (EMS) any IT Manager can be safe in the knowledge that the environment of their communications rooms is operating within their own prescribed specification's.

WHAT DOES IT DO?

- Do you know the condition of you local and remote comms rooms and data centre?
- Has the CRAC Unit leaked water through the room?
- Has the temperature hit your safety threshold?

All this can be monitored and managed through a well designed and delivered EMS.

FEATURES

- Cloud based
- Completely flexible threshold management
- Proactive notifications
- Peace of mind
- Remote management
- Leak detection
- Motion sensor cameras

PROACTIVE MANAGEMENT

- Leak detection
- Temp & Humidity monitoring
- Motion activated IP Cameras

INTEGRATION

- Can interface into BMS, CRACs and other facilities systems
- Can monitor building, campus and interstate environments
- Cloud based SaaS options
